

FOR IMMEDIATE RELEASE

Lockheed Martin STS (UK) chooses up.time for server monitoring

Toronto, Canada, July 15, 2005 – uptime software™ is pleased to announce that Lockheed Martin Corporation – an advanced technology company with over 130,000 employees engaged in the research, design, development, manufacture and integration of advanced technology systems, products and services – has chosen up.time 3.0 in the UK-based STS group for performance and availability monitoring of mission-critical servers.

“We are pleased to welcome Lockheed Martin’s STS group as a new uptime software client. Like so many organizations we hear from every day, the STS group quickly found up.time to be a powerful yet easy-to-use tool for server capacity planning, reporting and monitoring of systems infrastructure.” said Lorne McNeil, VP Operations, uptime software, and further comments “Our client base grows rapidly as more and more high technology firms, like Lockheed Martin, discover that systems management tools need not be expensive and complex to deliver immediate value to an IT operation.”

up.time 3.0 is an easy-to-use, easy-to-install, low-cost, yet powerful Web browser-based server performance and availability monitoring system, which enables rapid:

- Server Performance Monitoring
- Application & IT Service Health Monitoring
- Problem Detection, Alerting & Automatic Recovery
- Resource Trend Analysis
- Capacity Planning
- Root-Cause Analysis
- Powerful 3-D Charting & Reporting
- Integration with Enterprise Consoles
- Effective Decision Making

all from your Web Browser, anytime and anywhere. You can now monitor Solaris, Linux, AIX, HP-UX, IRIX, Linux for IBM zSeries, Tru64 UNIX, Novell NetWare, Windows NT/2000/XP/2003 servers with our powerful up.time agents. A free 14 day evaluation copy of up.time can be found at <http://www.uptimesoftware.com>
