

THE TOP 10 REASONS TO CHOOSE "UP.TIME" FOR YOUR IT SYSTEMS MANAGEMENT SOFTWARE

It Just Works

Let's be honest. When it comes to IT systems management tools, most are as painful to use as the problems they are meant to solve. You need something that makes your job easier. Our customers love up.time because... it just works.

1. Complete

A complete application, service level, and server infrastructure performance and capacity monitoring and reporting solution for enterprise and mid-enterprise companies. Install up.time with no long deployment cycles, project teams, or expensive professional services needed. up.time installs in minutes and can be deployed to hundreds of servers in a single day.

2. Multi-Platform

Heterogeneous support for UNIX (AIX and LPARS, Solaris and Containers, HP-UX), Linux, Windows, Novell, VMware ESX, and more with a unified dashboard to monitor and manage all physical, virtual and cloud based infrastructure and applications.

3. Deep

Powerful and deep enterprise features right out-of-the box at a fraction of the price of HP Openview, IBM Tivoli, BMC Patrol, and CA systems management solutions. Why pay more? Get everything you need with up.time.

4. Affordable

Save 50% or more compared to solutions from IBM, CA, HP, BMC, NetIQ and others. Simple all-in-one licensing for UNLIMITED monitoring per physical server. We don't charge for add-on modules and all your ESX based VM Guests are free! Monitor your x86 based virtual machines with up.time and dramatically reduce your costs.

5. Scalable

Enterprise-class scalability to 10,000+ servers with multi-datacenter capability, multi-geography dashboards and consolidated global reporting.

6. Easy

Incredibly intuitive and easy-to-use. No training or professional services required for deployment or maintenance. No baby-sitting or time consuming administration needed.

7. Customizable

Our custom "PLUG-IN" feature allows you to instantly import and continue using any existing monitoring scripts/tools currently in use. Develop your own custom monitors to report on anything that has an IP address or visit our up.time community to choose from hundreds of approved plug-ins.

8. Open

up.time works synergistically with other tools and preserves your investment in existing systems management software. Through our open database and API, easily integrate with any existing systems management software or point tools (e.g. Service Desk, Asset Management, etc.) and ITIL processes.

9. Responsive

Unlimited solution expertise and software support services are available anytime and anywhere via phone, email, support portal, and uptime online forums to ensure you are getting maximum value from your deployment. We love our clients...and will be at your virtual or physical doorstep whenever you need us.

10. Proven

With 900 corporations, educational institutions, and government organizations in 32 countries using up.time every day... you get peace of mind knowing you have the very best toolset to manage your IT infrastructure, at the best possible price.
