

up.time: Healthcare and Hospital IT Systems Management Software

Is up.time a Good Fit for Your Hospital or Healthcare IT Needs?

1. Is Your Hospital or Healthcare IT Environment Rapidly **Growing** or **Changing** due to new regulatory and compliance needs or Mergers and Acquisitions?
2. Would You Like to be able to Monitor and Manage **ALL** IT Infrastructure, Applications, Databases, and Network flows in Your Healthcare Organization?
3. Is **Cost-Saving** a Priority for Your Hospital or Healthcare Organization?

uptime software is the creator of  **up.time**, a **single tool** for Hospitals and Healthcare IT departments to deeply monitor and manage their infrastructure and applications across virtual and physical environments.

- ✓ Over 700 customers.
- ✓ Simple and affordable licensing, with per-physical server licensing (even in virtual environments).
- ✓ Proven in Hospitals, Healthcare organizations and Mid-enterprises.
- ✓ A single tool to monitor your IT environment.
- ✓ Easy to use, with deployment in as little as 1-day.

"up.time proves that it has what it takes, time and time again. up.time is, frankly, superb.

Ridiculously easy to use, vast range of platforms supported, and addresses all the monitoring, reporting and alerting needs of the system manager. It really is the all-in-one systems management tool, especially with its attractive licensing." – TechWorld

*"We were outgrowing our current tool and needed deep monitoring and reporting that could still fit within our budget. Now, up.time makes reporting a breeze and scaling a non-issue. up.time is powerful, low maintenance and very easy to use. We fully deployed in 1-day." **University Health System***

Why Consider up.time?

When it comes to monitoring and managing servers and applications, hospitals and healthcare organizations have complex needs, and tight budgets. They require deep *and* broad monitoring that provides a one-stop view of the health of their IT environment.

- ✓ **A Proven Track Record in Healthcare:** up.time has been used by over 700 companies Worldwide, including over 50 Hospitals and Healthcare Organizations (Blue Cross, Mt. Sinai Hospital, University Health Network, Pennsylvania Department of Health, Queensland Health, St. Luke's Hospital, Harris Regional Hospital, and many more).
- ✓ **Deep and Compliant:** Deep metrics at the service, application, and system resource levels without the complexity of 'enterprise' tools. up.time captures all IT historical performance data over time, helping you meet compliancy requirements.
- ✓ **Avoid Being Outsourced:** up.time saves you IT budget while proving the high value of keeping IT inside the organization with easy-to-use SLA management.
- ✓ **Lower Cost:** Simply put, no other IT Systems Management software can provide the depth, ease-of-use, and cost-effectiveness to Hospitals and Healthcare organizations. Fully deployable in less than 1-day.

Affordable, Deep, All-in-One Healthcare and Hospital IT Systems Management

- ✓ **Easily Monitor and Manage Everything with up.time:** Monitor Virtual, Physical, Hosted or Cloud infrastructure, applications, services across platforms (Windows, UNIX, Linux, VMware, Novell, etc).

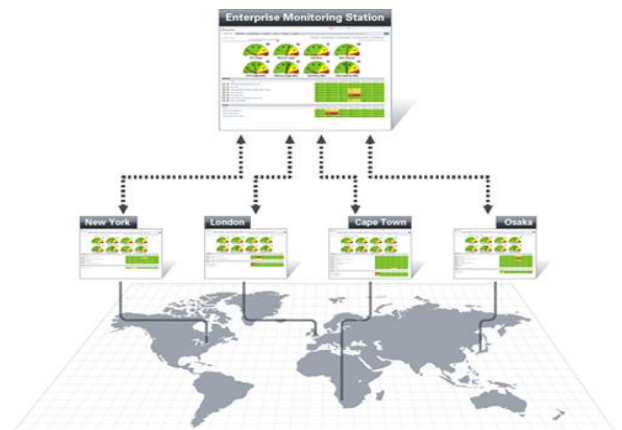

- ✓ **Monitor All Applications and Databases:** Monitor all services and applications that are critical to your EHR (Electronic Health Records) projects. Monitor your database interface availability to ensure patient records are flowing across the network correctly.
- ✓ **See Capacity Problems Before They Happen:** If you have large storage needs (imaging, etc), then have up.time watch over disk levels and alert you when storage capacity is nearing thresholds.
- ✓ **Easy-to-use, Fast Deployment, No Additional Services Needed:** Install in minutes and deploy in as little as 1-day, very low maintenance.
- ✓ **North-American Based Support:** Get top tier support every time.
- ✓ **Affordability Perfect for Healthcare:** Simple Per-Physical-Server Licensing: No tiers or management packs and free lifetime upgrades with support. Just count your physical servers (even in VMware environments!). Installs in minutes, deploys in as little as 1-day.

"At St. Luke's Hospital, we have a complex heterogeneous IT environment that includes over 100 Windows servers, 30 Unix servers, and 75 VMware Virtual Hosts along with remote servers throughout the community. We monitor all server processes with up.time, including webs servers, databases, & interfaces to ensure the flow of critical data (like E-records) across systems. We looked at Tivoli, but the cost was many times higher than up.time. In the end, it was an easy choice. up.time was easy to use, very intuitive, highly affordable, fast to deploy, and made IT server management significantly easier. All in all, up.time does exactly what we need it to." - **St. Luke's Hospital.**

Relax, up.time has you covered:

- ✓ **Control Everything:** Monitor the virtual and physical environments from a single dashboard (Windows, VMware, Solaris, AIX, Linux, HP-UX, Novell, and public Cloud).
- ✓ **Monitor and Manage Multiple Locations:** Easily monitor and manage multiple datacenters and hospitals, regardless if they are around the block, or around the globe.
- ✓ **Scale Up:** Easily monitor from 25 to 5,000 servers or more across one or multiple datacenters.

Global Monitoring Views across Multiple Datacenters
